

# Work faster, shine brighter

## OptraGloss® Extra Oral

Efficient extraoral polishers  
for ceramic restorations

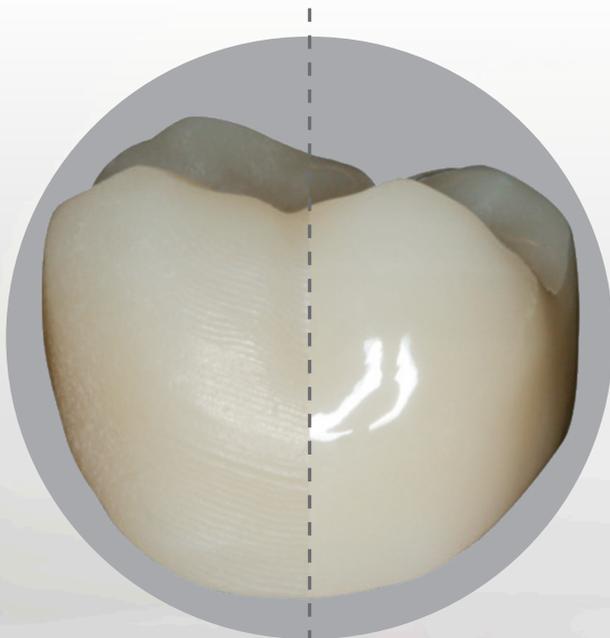

# Try it. Love it.

Speed up your workflow even more  
with OptraGloss® Extra Oral polishers

High-gloss polishing in almost no time

From an unpolished to a highly esthetic surface in just a few minutes, shown on an IPS e.max® ZirCAD Prime restoration

Unpolished | Polished to high-gloss

- ✓ Can be used on oxide-ceramic and glass-ceramic materials, even on zirconium oxide prior to sintering and lithium disilicate before crystallization
- ✓ Easy and efficient application
- ✓ Cost effective due to long service life and further time savings

Three coordinated shapes:  
"Spiral Wheel", "Disc", and "Flame" for all surfaces
